What is the product used for?

As a reservoir for recirculating Formal Falls fountains; houses the pump, plumbing, auto fill valve and water reserve.

When do you use this product?

When installing a stand alone recirculating Formal Falls fountain in almost any hardscape environment. The basin can be installed in ground or above ground depending on the desired elevation of the basin area.

How is it sized?

Basin size is determined by the size of the Formal Falls waterfall it is to be paired with.

Special Features?

Strong structural design, easy pump access, dual stainless steel pump access lids, built in auto fill connection port, built in plumbing discharge connection ports, prefilter / antisplash mat.

Complimentary products?

Aqua Bella auto fill valve paired with the 30 psi regulator

Specifications:

- Manufactured in the USA, using Medium-Density Polyethylene (MDPE)
- Can accommodate an optional auto fill valve
- 5 year warranty
- Easy plumbing installation through molded top grate holes
- Dual stainless steel access lids
